

LITTLE LAB COATS • PRINTABLE STEM GUIDE

5 STEM Activities for Kindergarten

Five easy, hands-on science invitations with enough direction to actually use.

How to use this: Pick one activity, gather simple supplies, and keep it short. The goal is not a perfect lesson — it is noticing, testing, comparing, and talking together.

1. Ramp Roll Rescue

NEED: BOOKS, CARDBOARD, TOY CAR

Try it: Build one low ramp and one steep ramp. Roll the same car down both.

- Which ramp is faster?
- Which ramp lets the car go farther?

2. Sink or Float Bowl

NEED: BOWL OF WATER, 6 HOUSEHOLD OBJECTS

Try it: Predict first, then test each item in water.

- Which items surprised your child?
- Did any heavy item float?

3. Magnet Hunt

NEED: MAGNET, SAFE ITEMS FROM AROUND THE HOUSE

Try it: Make a “sticks” pile and a “does not stick” pile.

- What do the sticking items have in common?
- Which guesses were wrong?

4. Leaf Detective Walk

NEED: 3 LEAVES, OUTDOOR SPACE

Try it: Compare leaves by size, color, shape, and texture.

- Which leaf is smoothest?
- Which one is biggest?

5. Paper Bridge Rescue

NEED: PAPER, 2 CUPS, PENNIES OR SMALL BOOKS

Try it: Test a flat sheet first. Then fold or roll it and test again.

- Which design holds more weight?
- How did changing the shape help?

Little Lab Coats • Kindergarten STEM that is simple, visual, and actually doable at home
